QUESTIONS

(1) Create an html file by applaying different styles using internal style sheet?

(2) Create an HTML page to change the background colour at every click using java script event handling?

(3) Write a PHP form to store Indian cricket players and display them on HTML table.

ANSWERS

(1) Create an html file by applaying different styles using internal style sheet?

PROGRAM

```
<html>
<head>
<title>Television</title>
<body style=" background-colour: light blue; colour:red">
<h1 style="colour: green; text-align: center; font-family:
                                               serif;
       font style: italic;"><b><u> <center><i> TELEVISION>
                <i></center><u></b></h1>

<p>    Television (TV), is sometimes shortened
```

to tele or tely is a tele communication medium used to transmit moving images in monochrome, or in colour and in two or three dimensions and sound. The term can refer to a television set, a television show, or the medium of television transmission. Television is a mass medium for advertising, entertainment, news and sports.</p>

```
<body>        <a href="table.html"><b>
<font>        <center><img src="tv.Jpg"></center>
<body>        </body>
</html>        </head>
```

(2) Create an html page to change the background colour at every click using java script event handling.

PROGRAM

```
<html>
<head>
<script>
var n=0;
function changeColor()
{
    var colorList = ["red", "blue", "Yellow", "violet", "green"];
    document.body.style.backgroundColor = colorList[n];
    n++;
    if (n>colorList.length-1)
        n=0;
}
</script>
</head>
<body>
```

```
<button onclick = "change color ()"> click me to change
                the colour </button>
<body>
</html>
```

(3) Create a PHP code to store name of Indian cricket Players and display the same in HTML code table?

PROGRAM

```php
<? Php
$Players = c
array c" Dhoni ", "Sachin", "Kholi", "Harbajan sing",
        "Gautham Gambeer", "Rohit sharma", "Bumrra");
echo " <table border = '3' width = '200' height = '100'>>
echo "<tr ><th> <h1 > players </h1> </th> ><ltr>";
for c$i = 0; $i < count c$players); $i++)
  {
      echo "<tr> <td>". $players C$i J. " </td ></ltr>;
  }
  echo " </table >";
?>
```
